

Adults need
vaccines, too!

August is National Immunization Awareness Month. People of all ages need vaccines, not just children. Vaccines can prevent a number of diseases and the serious complications caused by the disease.

Take the following quiz to see what vaccines adults and adolescents should receive.

English version: <http://www2.cdc.gov/nip/adultimmsched/>

Spanish version <http://www2.cdc.gov/nip/adultimmsched/quiz-sp.asp>

Talk to your health care provider about the appropriate vaccines for your age and medical conditions.

Protect yourself and your family from vaccine preventable diseases.
